ACTIA and AMPERE confirm the second stage of their technological cooperation

On 29 March this year, ACTIA began a technological cooperation project in the field of embedded systems for vehicles with Ampere, the Renault Group entity in charge of smart electric vehicles.

Following the signature of an initial agreement covering the sharing of software expertise during the first half of 2024, the cooperation has been further strengthened by the signing of another agreement calling for the integration by Ampere of a dedicated team developed by ACTIA.

The completion of this second stage of the cooperation is a tribute to ACTIA's know-how in the field of embedded electronic systems for vehicles, both from the point of view of its technological expertise as well as its ability to support and help develop skills.

This cooperation is a perfect fit with ACTIA's strategy of positioning itself as a major player in the transformation of the automotive sector. It will enable the group to capitalise on its high level of technological expertise in its core business, namely embedded electronic systems for vehicles and, ultimately strengthen its financial structure as part of the ongoing efforts made over the past 2 years.

ABOUT ACTIA

ACTIA Group is a mid-market company (ETI) founded in 1986. It is at once family-owned and international and its head office is located in France. The family aspect guarantees the long-term future of the Group and its independence with an ever-present entrepreneurial spirit. ACTIA's business is to design and produce electronics to manage systems in the particularly demanding fields of automotive, rail, aeronautics, space, defence, energy and telecommunications.

The commitments made by ACTIA are reflected in the Group's ambitious contributions to addressing the challenges facing society: mobility, connectivity, safety and the environment. Control over the design and production of solutions bearing the ACTIA signature is a true guarantee of quality. Without exception, all Group employees share this belief in quality in a fully certified environment.

KEY FIGURES

- 2023 turnover: €579.3m.
- More than 4,200 employees around the world, of whom approximately 1,450 engineers and technicians working in R&D.
- Present in 17 countries.
- 14 to 18% of revenue reinvested every year in R&D.
